

Christian: When I was younger, I explored the globe, getting culinary skills under my belt and searching for inspiration. I quickly learnt that, more than any ingredient, it's important who you eat with.

Christian's daughter: Daddy, I want sausage bolognese!

Christian's son: Daddy, I want a ginormous hot dog!

Christian: See! Everyone wants something different. It's ok. I'm prepared for anything.

Judith: Don't forget to prepare for our future, too!

Christian: Of course! The world is changing so fast and, with kids to take care of, minimising risk is now our top priority. I spoke to our HSBC Premier Relationship Manager and he recommended Wealth Portfolio Intelligence Service. It helps us manage our investments precisely based on the level of risk-return we're comfortable with and helps us keep our portfolio fine-tuned.

Judith: So that we can potentially increase our return by managing risks carefully.

Christian: And with greater returns, I can have bigger portions of food!

Judith: That's extra portions for the kids – not you!

Judith: Honey, our Premier Relationship Manager also said that, besides offering protection, some insurance plans can also help us grow our wealth.

Christian: And it's great to have a plan that can protect our kids and my money!

Judith: You mean our money!

Christian: I'm Christian.

Judith: I'm Judith.

Christian & Judith: We both use HSBC Premier.
