

Samuel: When my students ask me for overseas study tips, I tell them “Always diversify your investment”. The more varied your interests, the richer your opportunities.

And it’s the same with investment. Diversify your investments in different assets and different markets.

I always wanted to invest in property overseas. But my friends remind me that I cannot do everything by myself. I would have to call overseas in the middle of the night.

Thankfully, with HSBC Premier’s International Mortgage Desk service, I get a team of experts to handle my mortgage applications from Hong Kong, so I don’t have to be there myself, it’s so much easier.

In addition to property, I want to capture more global investments opportunities while I’m still young, of course. But, since I’m always on the go, how can I spare time to get the info I need?

With HSBC Wealth Insights, I get market updates online from the US, Europe, Asia and emerging markets about various asset classes.

So, now I keep my investments diversified. And I can concentrate on helping my students plan their future.

I’m Samuel.

I use HSBC Premier.
